TABLE OF CONTENTS

Welcome to our SIP (Symbiote Integrated Products) catalog. In order for us to add products and update the catalog, you must reference the web site to find the most current information. Printed copies of the catalog must be continuously updated. The following is a description of how this will work.

Updates will be noted with the latest revision (Rev.) number at the bottom of the page that has been changed. The revision number informs you of an important change to the catalog page. Changes to the page may include, but are not limited to, the introduction of a new product, change in description, elimination of a product.

This catalog can change frequently, so please take the time to look over the changes and update your printed catalog.

- Date of Change - Date the change was made to the catalog.
- Page Number - Page identified where the change was made.
- Description - Brief description of the change that was made.
