

Furniture that works for you

CONNECTING YOUR BUSINESS TO MODULAR FURNITURE SOLUTIONS

Symbiote strives to develop the furniture you need for the most demanding environments. From life sciences to technical manufacturing our modular furniture is easy to add on and easy to reconfigure. Ergonomic products, like our height adjustable tables, offer individual comfort, enhanced productivity, and adaptive accessibility for sitting or standing.

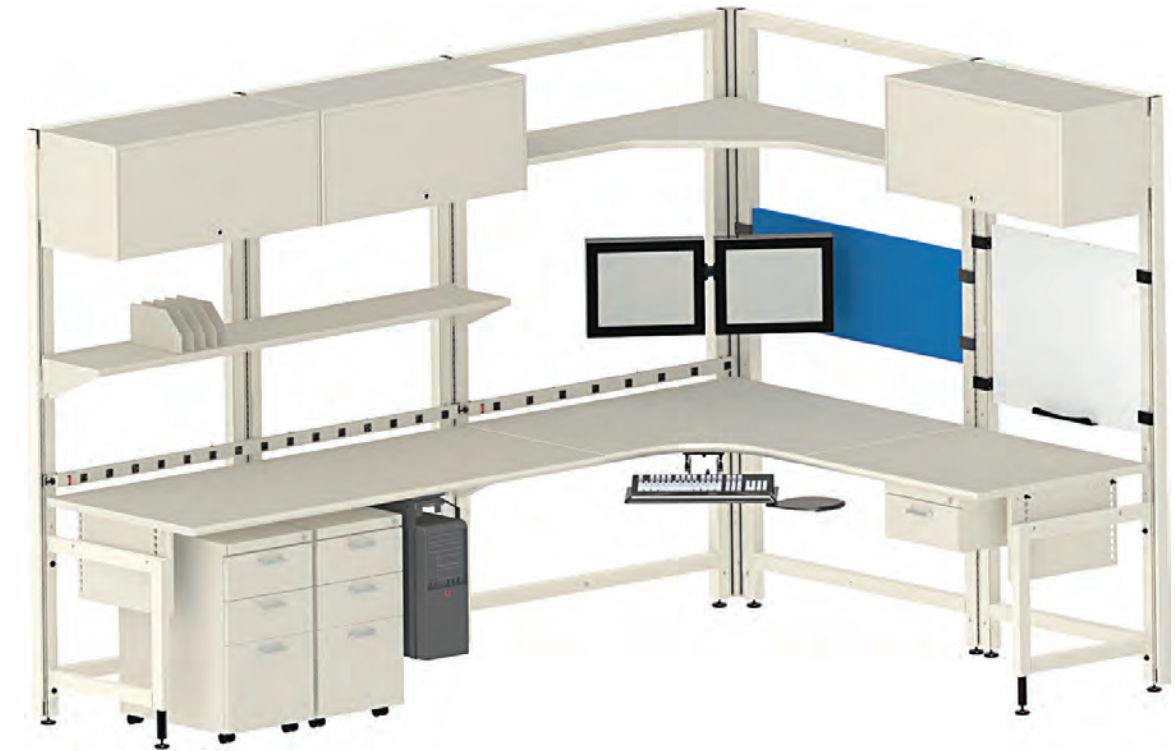

Our laboratory furniture is durable and reliable. It is used in some of the world's most renowned research universities and medical centers that maintain large investments in equipment and require clean rooms. We offer ESD options with virtually all of our products for businesses who perform static sensitive tasks; and we offer customization for special projects.

Our technical furniture allows manufacturers to reconfigure spaces quickly for daily production needs or educators to shift the enrollment focus from science to information technology. Understanding how you work is one of several methods we employ to streamline your work space.

Whatever your goal, Symbiote is committed to results driven practices and engineered solutions for your current needs and for the future evolution of your business.

APPLICATIONS

Research and Development	2
Healthcare and BioTech	4
Information Technology	6
Material Handling and Assembly	8

02 Research and Development

With the role of emerging technology in research and development, ESD safe workstations are now crucial to universities, hospitals, labs and government facilities. Our steel frames maximize vertical storage, adjust in one-inch height increments and have options such as cabinets, multi-function shelves, task lighting, and pegboards. Our mobile pedestals keep tools and equipment readily accessible for cooperative projects.

Multi-Function Shelf

Welded 18-gauge steel construction shelves mount flat or sloped. Available in depths of 11, 15, 18 and 24 inches.

Mobile Pedestal

Combination of box or file drawers, locking or non-locking, hanging or on casters.

Fabric or White Board

Tackboards for display areas and magnetic, erasable whiteboards for communication.

Storage Cabinet

Secure overhead storage with retractable door that slides inside the cabinet.

Shelf Mount Light

Multi-purpose task light illuminates surfaces under storage cabinets, multi-function and corner shelf areas.

04 Healthcare and BioTech

Clinical healthcare providers see frequent changes in hardware and software as more tasks are performed with high tech equipment. A utility distributor framework, coupled with modular furniture, adapts to technology and workflow changes. A drain board, sink base and wall case cabinets allow workers to manage complex processes easier while maximizing valuable floor space.

Utility Distributor

Pre-wired electrical distribution throughout with voice/data networking capabilities.

Mobile Base Cabinet

Steel construction with a chemical resistant epoxy powder coat paint finish. Several drawer and door options.

Drain Board

Convenient drying space for beakers of all sizes.

Sink Base Cabinet

Removable bottom pan and open upper back for access to plumbing.

Wall Case Cabinets

Welded 18-gauge steel construction with a chemical resistant paint finish.

06 Information Technology

Data centers, technology schools and information rich applications function best with an open frame design. Some of the world's largest software companies use Symbiote furniture because it can be easily reconfigured with minimal disruption. Modular furniture gives you the flexibility to install benches at sitting or standing heights. Frames incorporate both horizontal and vertical integrated cable management accessible from both sides. Surface components adjust in one-inch increments. Task areas are outfitted with monitor arms and keyboard trays. Rack modules and tower dollies keep important hardware close by.

Rack Module

Support electronics and rack mount accessories.

Cable Management

Horizontal or vertical storage for electrical cords and cabling.

Keyboard Tray

Mounts on monitor arm or under work-surface.

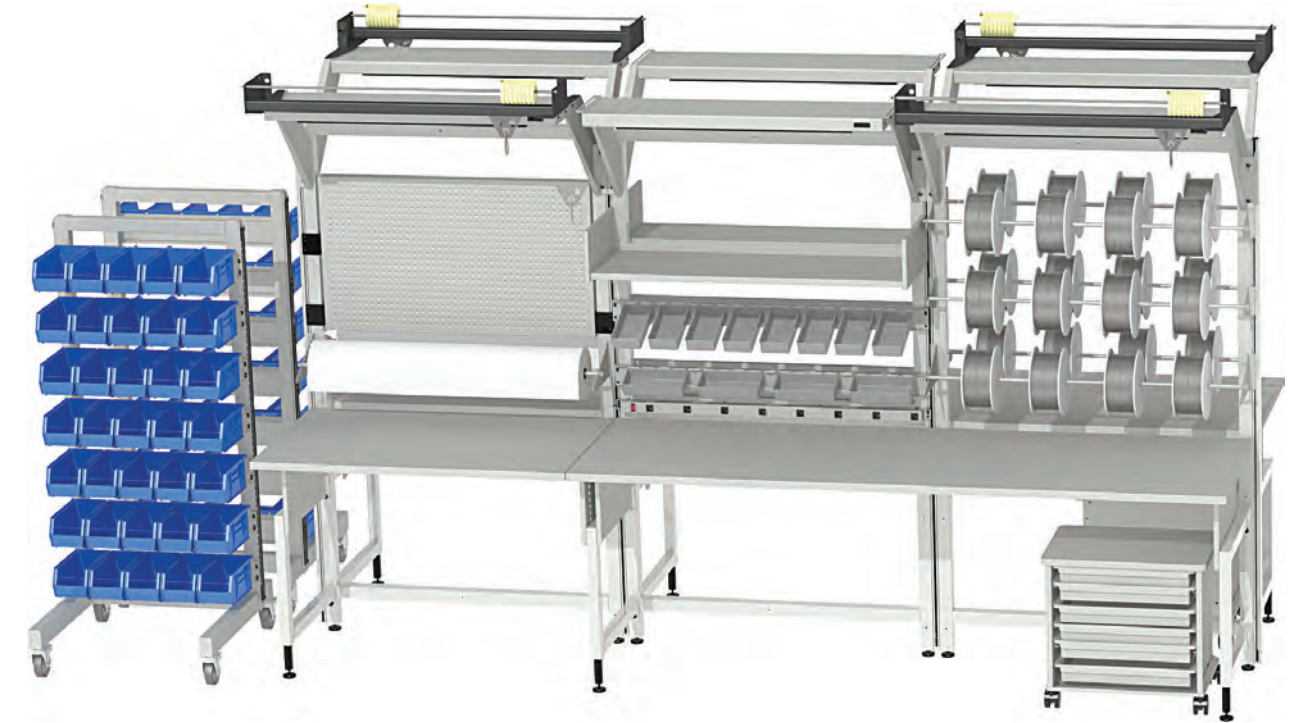

Arm and Slatwall Rail

Industry standard VESA mount for flat screens and other components.

Tower Dolly

Mobile storage for computer hardware under workstations or open areas.

08 Material Handling and Assembly

Ergonomic, height-adjustable work tables engineered by Symbiote offer superior performance and customization for assembly applications. Our electric bench and table lines support a gross dynamic load capacity of 750 pounds. Plus, our storage options allow individuals to create space-efficient configurations to maximize their footprint. Add accessories like the tool traveler, dispensing rail, spool holder, mobile cart, and mobile tote frame to improve material handling for tools, parts and equipment.

Tool Traveler

Suspend small hand tools above workstations with an 8-inch fore and aft adjustment, with or without air.

Mobile Cart

Single sided, mobile cart moves where you need it.

Dispensing Rail

Hanging support for Symbiote brand subcontainers.

Mobile Tote Frame

Slots at three inch increments provide mobile storage for totes.

Spool Holder

Mount to frame or hang from bin rails to display material.

Government, Healthcare, Laboratory, R&D and Manufacturing Furniture Solutions

Business Driven Results

Our goal is to provide business driven results and best practices for your current project needs and the future evolution of your space.

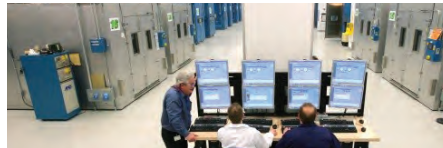

Furniture Solutions

We research industry targets to help our customers understand how product applications provide them the most space-saving and reconfigurable solutions.

Integrated Design

Our president's career has been spent on the cutting edge of design and research. We blend years of working with people and products to make functional and aesthetic furniture.

Extensive Experience

With more than 28 years of experience, we take pride in manufacturing high quality furniture and building good relationships with our customers.

300 North Centennial Street, Zeeland, MI 49464 | 800.283.2434 | symbiote.com

Products are manufactured in the USA according to environmental practices and standards for sustainability.
