

## Furniture Solutions For Healthier Environments

## Smart Environments

Lab space is at a premium. We can help you create a flexible environment with standard products and custom solutions.

A smart modular design helps maximize valuable lab space—and that's good for business. It also makes a positive impact on the people who work there. Mobile carts, height-adjustable tables, adaptable storage, accessible power and repositionable task lighting help eliminate downtime and increase effectiveness.

When necessary you can reinvent your space to one that works best for you.

### APPLICATIONS

- hospital/medical
- biotech
- diagnostics
- genetics
- life sciences
- pharmaceuticals
- instrument/design/development
- surgical prep and pack
- university research
